# Tooltips and Help Text

## 1. Introduction

Tooltips and help texts guide users while filling complex or critical form fields. They reduce confusion and improve the accuracy of submitted data.

## 2. Tooltip Configuration

- Tooltip text is added during variable creation.

- Tooltip appears when the user hovers over the information icon or field.

## 3. Help Text Usage

- Used to explain complex inputs.

- Provides examples and guidance.

- Improves form clarity.

## 4. Best Practices

- Keep tooltip text concise

- Use simple, non-technical language

- Apply tooltips only where necessary

## 5. Conclusion

Tooltips and help texts enhance usability by providing real-time guidance, reducing errors, and improving user confidence during request submission.
